Void-Fill and Cushioning
Packaging Solutions

SUSTAINABILITY... OUR NUMBER ONE GOAL

Sustainability is at the heart of everything we do. At Sealed Air we are empowered to constantly innovate and improve. Every day, for our customers, for the world.

Sealed Air's paper manufacturing plants process approximately 45,000 tons of recycled paper per year. The benefits of recycling 45,000 tones of paper per year include:

7,884,000

trash bags worth of landfill space saved

REDUCED GREENHOUSE GAS EMISSIONS:

45,000

metric tonnes
carbon equivalent

1,200,000,000

litres of water saved = to 1 billion 1L water bottles

At Sealed Air, we pledge to design and advance our innovative packaging solutions to be **100% recyclable or reusable by 2025**

We will accelerate the use of recycled materials, expand reuse models for our packaging, and lead the collaboration with partners worldwide to make this happen.

We solve our customers' most critical packaging challenges with innovative solutions that leave our world, environment, and communities better than we found them.

With our range of high performance, efficient and sustainable paper solutions we are helping our customers meet their sustainability goals.

To accelerate these efforts within our operations, our customers' operations and, ultimately, for consumers, we will:

Invest in Innovation

Design and advance packaging solutions to be 100% recyclable or reusable

Eliminate Plastic Waste

Achieve an ambitious target of 50% average recycled content across all packaging solutions of which 60% is post-consumer recycled content

Collaborate for Change

Lead collaborations with partners worldwide to increase recycling and reuse rates

The sustainable choice that doesn't compromise on performance

Sealed Air's range of paper solutions provides high performance void-fill and cushioning product protection, that is made from 100% recycled content, which is responsibly sourced and carries Forest Stewardship Council® (FSC) certification. It can also be reused or curbside recycled with mixed paper.

Sealed Air has decades of specialised expertise in fulfilment design, testing of packaging applications and service excellence. This makes us a natural fit to help you integrate paper technology into your operation.

We can partner with you to select the right equipment to create the perfect pack, that will help you hit your targets.

Our packaging experts will help you select the right mix of paper packaging technology that:

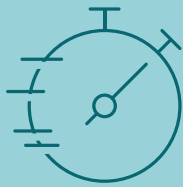

- Keeps up with high-volume demands
- Reduces downtime
- Protects against damage
- Flexes and scales as your operation grows

A stylized white leaf icon on a teal background.

77%

That's the number of E-Commerce consumers who think the packaging that a company uses to ship to them should **reflect their environmental values**

We can protect products and the planet at the same time

IMPROVED EFFICIENCY AND PERFORMANCE

High speed systems which improve your packaging operation: from lightweight void-fill and wrapping, up to heavy duty cushioning applications. Our wide range of performance systems are ideal for small to high throughput operations. The single motor design reduces power consumption and conserves energy.

EASY TO OPERATE

Systems ergonomically designed to meet customers' needs: from a single workcell with easy-to use manual or automatic dispensers, to an automated in-line operation.

Built-in automatic cutting technologies allow for simple, smooth operation and easy paper release.

IMPROVED CUSTOMER EXPERIENCE

Our paper solutions showcase your brand and demonstrate a commitment to environmentally responsible packaging that enhance your company's image.

In addition, our Technical and Support Service team install new systems and deliver full system training to operators.

OUR RANGE OF SOLUTIONS

We have the perfect solution for every application and packaging operation

Void-Fill

Occupying empty spaces within the carton, reducing product movement during the shipping cycle.
Easily fits to any shape, filling the smallest to the largest void spaces.

Void-Fill Market Sectors

FasFil® Mini

Manual paper packaging solution

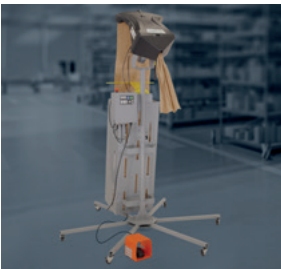

FasFil® M

Ergonomic accessory: easy-to-use manual funnel

FasFil® EZ Auto

Easy-to-use paper dispenser with automated features

FasFil® 1500

High-speed paper dispenser with enhanced features

FasFil® Jet

Paper system for large sized packaging offering superior void-fill efficiency

Packaging Techniques

WRAP CROSS

CRISS CROSS

WRAP AND LAYER

Cushioning

Preserving and protecting the integrity of fragile products from the adverse effects of shock and vibration during the shipping cycle

Cushioning Market Sectors

3PL

E-Commerce Packaging

Industrial Components

General Manufacturing

Automotive

Electronic

Cosmetics

Health & Beauty

Medical Equipment

PadEZ®

Paper system with clever automated features for enhanced productivity

Medium

ProPad®

Most resilient, flexible and versatile paper system

High
